

BBC SCHOOL REPORT; Alice in Wonderland

The movie Alice and Wonderland is all about wonders. The wonders let us know that there are different things going on than in real life. The movie can inspire you by the magic. Alice the head character is a nice and cheerful girl. She experiences lots of different things.

There will be an audition at DSTC. Some of the staff that are organising the event want to comment on this report.

Learning manager of DSTC Miss Watson said; "there were 52 students who auditioned. This means there will be a big cast, which will make it a fantastic show because we want to show the amazing talents at DSTC."

We also interviewed some students, some were excited to report their opinions but some were not. We first interviewed year 11 because they are grown-ups and they will know what is right and what is not. Also because, they are teenagers so their opinion may be different and stand out than year 7's opinions. Two year 10 students were very excited to report their opinion. They said they don't want to go because of shyness. An improvement for our school is to make posters more BOLD because year 10 said they didn't see any posters. Whereas year 7 reacted on that statement and said; "they avoid reading posters." Year 8 said Alice in wonderland is too childish and that's why didn't show up.

Another member of staff said the following; "We want performing arts to be enjoyed in school. It teaches a lot of skills such as; co-operation, self-discipline and confidence. Nobody in school is forced to attend the musical." Miss Bradshaw is expecting girls to sing in tune and in harmony also to learn song quickly. It's important to join the musical because its helps you with your education. When dance, music or drama is not your strongest point and you enter the auditions it will help you with your confidence and it will let you improve your skills. The music auditions took place in the dance hall.
